"I was uncertain about engineering earlier but after this class, I am pretty confident about my future as an engineer."

"I liked having a real client because it made the whole project mean something."

GEEN 1400, is an interdisciplinary hands-on introductory design course to explore real-world engineering and creativity in a teamwork environment.

Design and Innovation... It’s what Engineers do!

Project themes: assistive technology devices, Rube Goldberg contraptions, devices for developing communities, and hover crafts.
